PROFILE

I'm a full-stack web developer who wants to make a difference in the world we see today. With so much going on around us, I seek to find ways to contribute to the positive in any way I can. I find fulfillment in helping people and companies adapt in this changing world, bringing them closer together and making it possible for them to be able to thrive in their business endeavors.

Related Skills

Languages: HTML5, CSS, SASS, JavaScript.

Technologies: Bootstrap, React, React Native, Redux, Node, Express, MongoDB, Mongoose, Reactstrap, React Router, Android Studio

Other: bash, yarn, npm, REST API'S, VS Code, GitHub, JSON, Postman, expo, slack.

PROJECTS

BioIt Inventory Mobile App

- **JavaScript, React Native, Node.js, Express.js, MongoDB, Mongoose, AWS**
- The app will streamline work for dozens of environment professionals and teams conducting bio inventories of karst properties.
- Currently developing a mobile app using react native and redux for state management. Technology stack is MER(React Native)N.
- Built out the backend using Node.js and Express.js to create RESTful api's.
- Utilized mongoDB and mongoose to create a scalable noSQL database
- Redux persist to ensure usability to users while out of service.
- Made use of expo and android studio emulator for testing the front end while using postman to test route api endpoints.

Timpanogos Grotto Website

- **JavaScript, React, Redux, React Router**
- Created a responsive, mobile-first web application utilizing JavaScript with react.js framework and Redux state management.
- Created the website to fill a need for a non-profit caving organization based out of Utah who plans to use the website.
- I saw a need for a non-profit organization and took initiative to make their online presence stronger.
- Shown back-end integration capabilities through use of json server.

Portfolio Website

- **JavaScript, React, Netlify**
- Created jasonweyland.com as my personal portfolio website showcasing my skills and main projects I have worked on, making it easier for employers to learn more about me.
- Demonstrated understanding of complete project timeline from creation to production.
- Demonstrated understanding of network security by ensuring TLS encryption and certificate

🎓 EDUCATION

Full Stack Developer, NuCamp, Chattanooga
February 2020 — August 2020

Completed NuCamp's full-stack coding bootcamp.

- Explored creation of single page web applications using the MERN stack.
- Using React Native, created a mock mobile app.
- Created my own solo project during the bootcamp using React.js and Redux for a non-profit organization.
- Used MongoDB, Express.js, and Node.js to build out a full server utilizing RESTful API's.

Graduated Valedictorian class of 2013, Bear River High School, Garland, Utah

★ CONTINUING EDUCATION

JavaScript Algorithms and Data Structures Masterclass, Udemy

Complete Python Developer, Udemy

Modern React with Redux, Udemy

The Complete Node.js Developer Course, Udemy

React Native: Advanced Topics, Udemy
